

Mild Traumatic Brain Injury Pocket Guide Mobile Application Now Available!

The Defense Centers of Excellence for Psychological Health and Traumatic Brain Injury (DCoE) teamed up with the National Center for Telehealth and Technology (T2) to develop a mobile application of the Mild Traumatic Brain Injury Pocket Guide to provide health care providers with a comprehensive, quick reference that includes clinical practice guidelines for assessing and treating service members and veterans who sustained a mild TBI. Key features of the application include:

- **Interactive decision trees:** Help identify the best interventions and timing of services for patients to optimize quality of care and clinical outcomes
- **Symptom management:** Identifies guidelines for managing common symptoms following mild TBI
- **Provider assessments:** Provide frequently used assessments and scoring tools used in treating patients with mild TBI
- **Relevant Defense Department ICD-9 coding:** Consolidates appropriate codes for efficient documentation
- **Interactive links:** Provide direct access to additional resources with a touch of a finger

The mobile application is free and available for download at <https://market.android.com/details?id=org.t2health.mtbi>.
